

Forest Stewardship Council (FSC®)

Certification verifies and assures the responsible sourcing of paper and wood products through rigorous standards and audits.

FSC® certification ensures that the paper or wood product comes from responsibly managed forests, reducing deforestation and promoting sustainable practices.

FSC® Certified Product

Choosing FSC® certified products support socially responsible practices, including fair treatment of workers, contributing to global efforts to combat climate change and environmental degradation.

Certified Chain of Custody

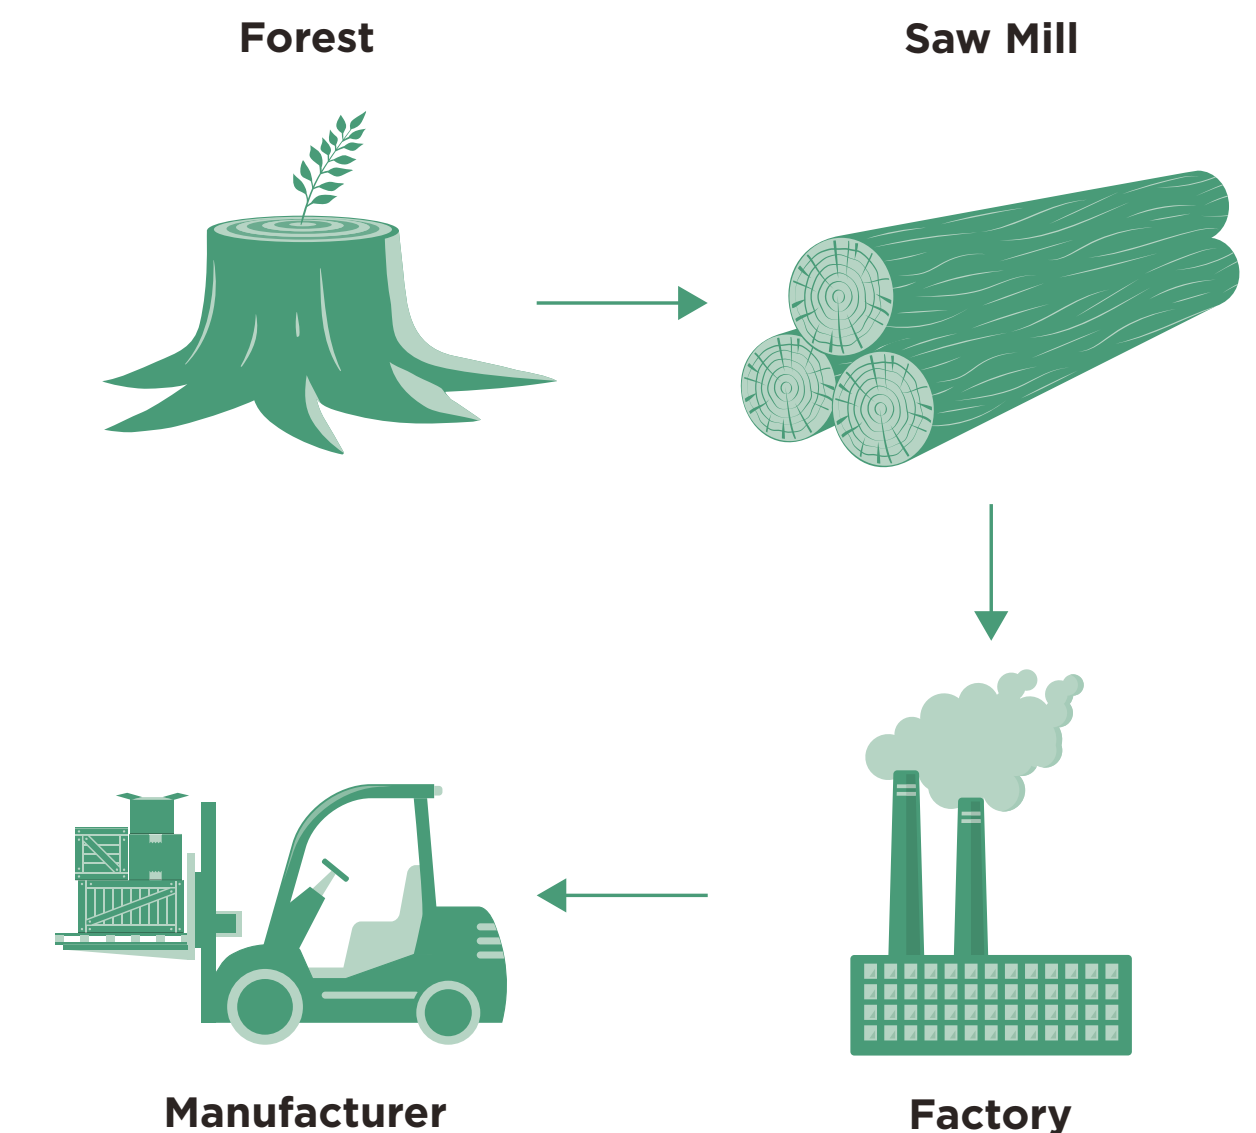

It includes a full certified chain of custody, meaning the entire supply chain from forest to end product is monitored and certified, ensuring transparency and the product's traceability.

Environmental Conservation

This certification helps protect biodiversity and the habitats of endangered species by encouraging conservation efforts within certified forests globally.

Confident Communication

Companies that adhere to these standards are granted FSC® certification, to indicate their commitment to sustainable practices.
