

REPREVE®

Brand that produces more sustainable fabrics by recycling post-consumer materials, primarily plastic bottles.

REPREVE® wants to promote sustainability and environmental responsibility in the textile industry by transforming plastic waste, specifically plastic bottles, into recycled fibres.

Promote Sustainability

REPREVE® aims to create a more sustainable future by recycling plastic bottles into high-performance fibres.

Reduce Waste

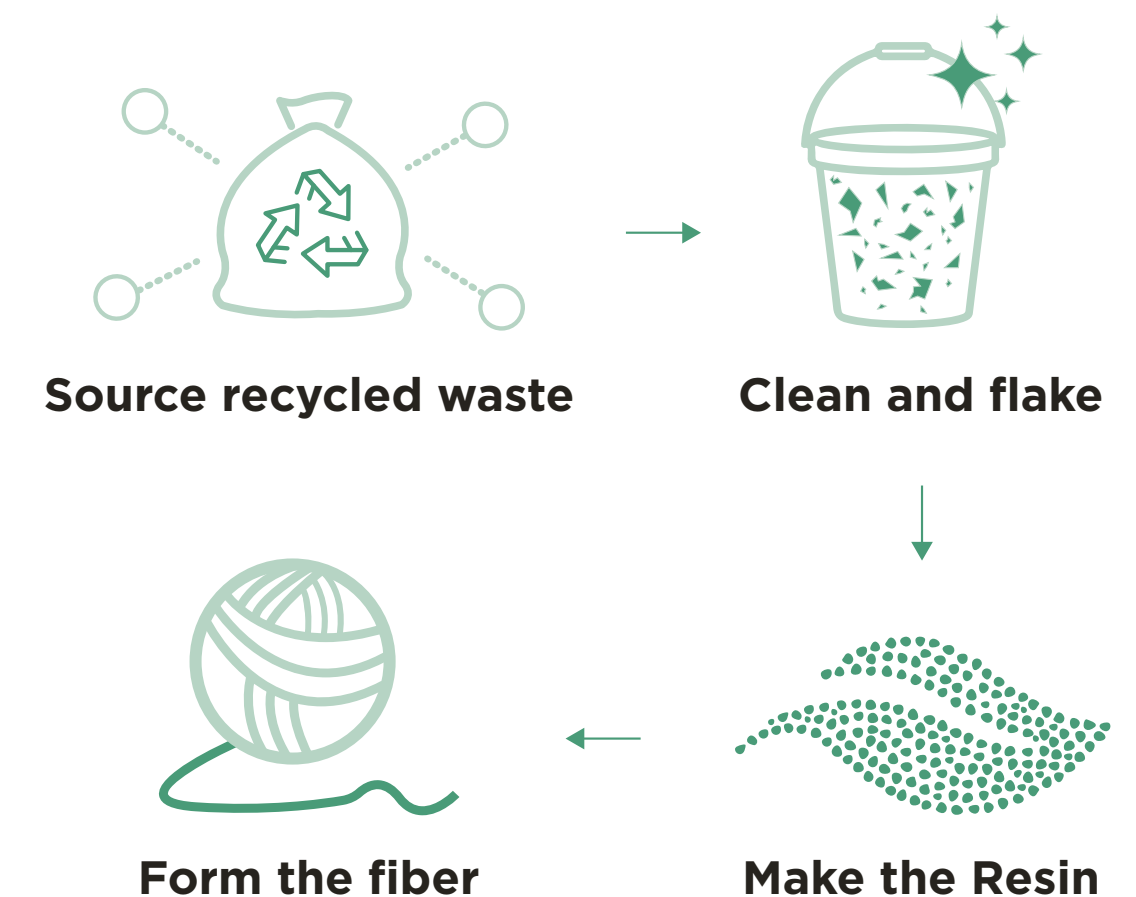

By transforming plastic waste into valuable materials, REPREVE® helps to decrease the amount of plastic pollution in the environment.

Conserve Resources

Using recycled fibres helps conserve natural resources like water and energy, as opposed to traditional manufacturing processes.

Encourage Responsible Practices

REPREVE®'s initiative encourages brands and consumers to adopt environmentally responsible practices in the textile industry.
